TECHNICAL SKILLS

React, JavaScript, HTML5, CSS3 /Sass, Java, Python, CSharp (C#), Django, Spring Boot, Node.js, Express.js, ASP.Net Core, AJAX, JSON, API, AWS, RESTful API, SQL, NoSQL, MongoDB, Mongoose, Oracle SQL, Bootstrap, GitHub, Postman, OOP, MVC/MTV,

TECHNICAL PROJECTS

Ticket Tracker | *Full-Stack Developer*
Developed a ticket management system for users to raise requests that deal with incidents, changes, issues, and other services.

- Built using Java 8 and Spring Boot to create and link 3 models using SQL database to enable users to track status of tickets..
- Tested application with Spring Tool Suite (Eclipse) and integrated jBcrypt passwords hashing to enhance user authentication and registration.
- Implemented CRUD operations to allow users to create, read, update, delete & assign tickets via sessions.

Web Portfolio | *Front-End Developer*
Designed a responsive web portfolio to exhibit personal projects and skills.

- Built a responsive web portfolio using HTML5, CSS3, Bootstrap and jQuery.
- Wrote custom transition animations in Vanilla JavaScript (ES6).
- Implemented Sass for faster development and modularization of CSS classes.

Record-Repo | *Full-Stack Developer*
Created an E-commerce record-themed app.

- Architected a full MERN stack application built with React.js using JavaScript shell to manage data from Mongo database via JSON calls.
- Implemented CRUD operations to allow users to view, add, update & delete items to unique carts via sessions, then post orders to NoSQL database.
- Simulated and tested application with VS Code and deployed application on AWS (EC2)server.
